

Kongsberg ai-cut Plug-in for Adobe Illustrator

Compatibility

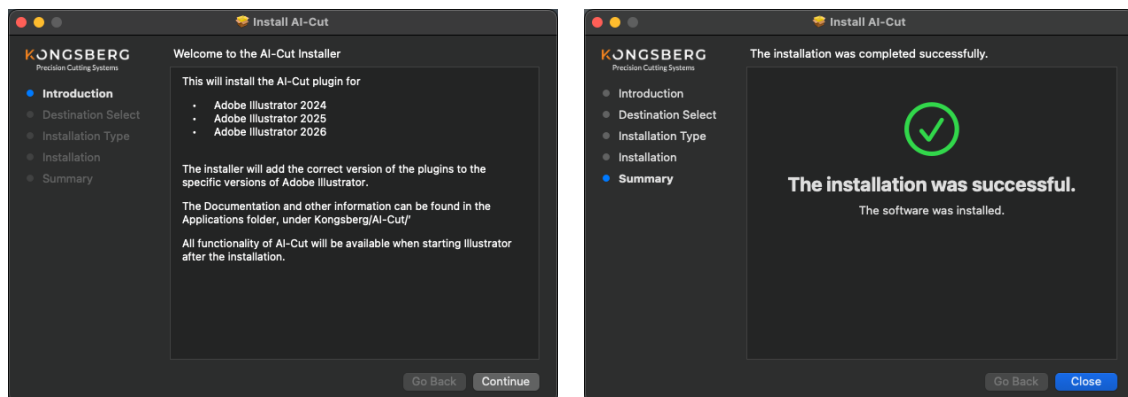

ai-cut 2026 is compatible with:

macOS 12 (Monterey) or higher
Adobe Illustrator 2026 (v30),
2025 (v29), or 2024 (v28)

Windows 10 or 11
Adobe Illustrator 2026 (v30),
2025 (v29), or 2024 (v28)

MacOS Installation

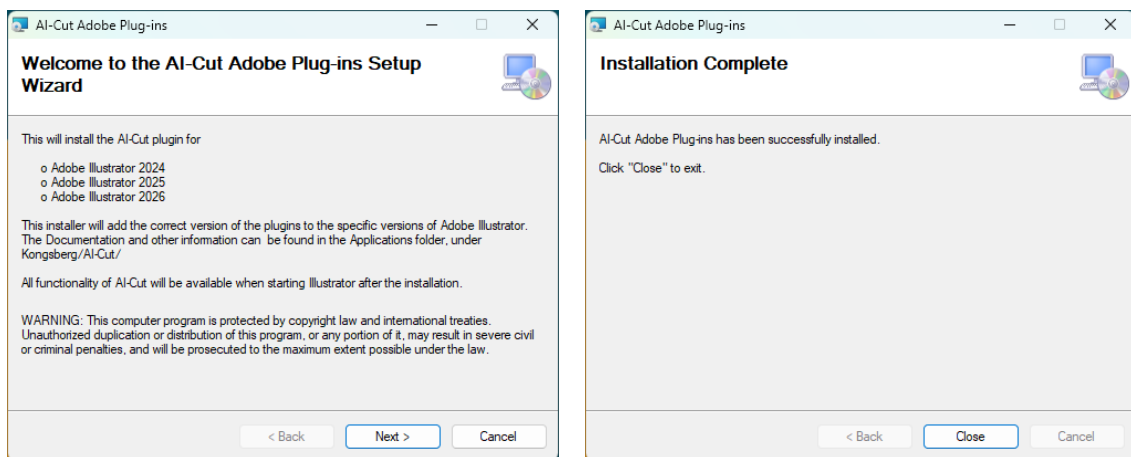

Unzip the downloaded installation folder and run **AI-Cut-Installer.pkg**. If macOS blocks the installer, allow it to run in **System Settings > Privacy & Security**, then continue with the on-screen steps:

If you previously copied an older version of the ai-cut plug-in into your Plug-ins folder manually, remove that older copy before running the new installer.

Windows Installation

Unzip the downloaded installation folder and run **Setup.exe**. If a previous version of the plug-in is already installed, the installer may require you to remove it first through **Programs & Features** before continuing. Once the installer launches, continue with the on-screen steps:

If you previously copied an older version of the ai-cut plug-in into your Plug-ins folder manually, remove that older copy before running the new installer.

Manual Installation

Manual installation may be required when security restrictions block the standard installers, and the process is straightforward once the correct files are located.

Preparing the Installation

Unzip the downloaded installation folder and open the **Manual Installation** directory. Inside, choose the folder that matches your version of Adobe Illustrator so you copy the correct plug-in files.

Windows installation

Copy the **AI Cut.plugin** folder and paste it into your Illustrator Plug-ins directory. The default location is: **C:\Program Files\Adobe\Adobe Illustrator\Plug-ins**

macOS installation

Copy the appropriate **AI Cut_UnivMAI30/29/28.aip** file (matching your Illustrator version) and paste it into your Illustrator Plug-ins directory. The default location is: **/Applications/Adobe Illustrator/Plug-ins**
